

Attention Lake County Citizens,

Lake County Road Department annually applies herbicides to County Road right-of-ways to maintain vegetation and control noxious weeds. As a citizen of Lake County, you have the option to complete a “No Spray” permit to let us know that you **do not** wish to have herbicides sprayed in front of or adjacent to your property. This permit is available on the Lake County website lakecountyor.org or at the Road Department office at 95574 Hwy 140 West. A new permit must be submitted to our office each year by March 1st. By completing this form, you become responsible for controlling all vegetation, including noxious weeds; in compliance with all federal, state, county and municipal statutes within the area you are requesting no spray. Please call our office at 541-947-6048 or visit the Lake County website at lakecountyor.org if you have any questions.

Thank you in advance for your cooperation.

Lake County Road Department
