COVID-19 CONTACT TRACING PROTOCOL

Lake County Public Health is assigned to complete all contact tracing for Lake County.

When a positive test case is received, the patient is asked who they were around and any close contacts:

- A close contact is defined by being within 6 feet of a COVID-19 case for a prolonged period of time (equal to or greater than 15 minutes)

If you are named as someone that fits the definition of a close contact, public health will contact you with information on what you may need to do.

If you have any questions, please contact Lake County Public Health at 541-947-6045, and we will be happy to answer your questions.

Please note that we will not release any personal or demographic information on anyone tested.

Public health investigations are confidential, and with the exception of necessary public health staff, we keep any information that is given to us private.
