OHA Update

Oregon reports 2 new COVID-19 deaths, 64 new COVID-19 cases

PORTLAND, Ore. — COVID-19 has claimed two more lives in Oregon, raising the state's death toll to 29, the Oregon Health Authority reported at 8 a.m. today.

Oregon Health Authority also reported 64 new cases of COVID-19 as of 8 a.m. today. The new COVID-19 cases reported today are in the following counties: Benton (2), Clackamas (6), Columbia (2), Curry (2), Deschutes (1), Douglas (1), Jackson (6), Josephine (3), Klamath (3), Lane (2), Linn (1), Marion (11), Multnomah (10), Polk (2), Umatilla (1), Washington (12). Oregon Health Authority reports new cases once a day on its website: www.healthoregon.org/coronavirus.

Oregon's 28th COVID-19 death is a 93-year-old male in Washington County, who tested positive on March 30 and died April 4, at Providence St. Vincent Medical Center. He had underlying medical conditions.

Oregon's 29th COVID-19 death is a 70-year-old female in Marion county, who tested positive on April 1 and died April 2, in her residence. She had underlying medical conditions.

Update: The COVID-19 case data OHA publishes once a day on its website and shares once a day with the media are provisional and subject to change. A case reported yesterday as a Yamhill County case was later determined to be a Washington County case. The total number of new cases in Washington County is 12 to reflect this change. However, the case that moved from Yamhill County to Washington County is not reflected in the total of new cases statewide for today.

Public Health Update

People that are being tested out of county but are Lake County residents, will now be part of the results updates. Those test results have just started coming in and we'll be adding them. If you have questions, please call Lake County Public Health at 541-947-6045.

39 tests have now been completed; 35 negative test results have come back with 4 tests pending. Turnaround time is 4-5 days for test results.

It is critical to emphasize that maintaining 6-foot social distancing remains important to slowing the spread of the virus. CDC is additionally advising the use of simple cloth face coverings to slow the spread of the virus and help people who may have the virus and do not know it from transmitting it to others. Cloth face coverings fashioned from household items or made at home from common materials at low cost can be used as an additional, voluntary public health measure.
